

AFRAM HANNA

FRONTEND DEVELOPER - FULL STACK DEVELOPER

Experienced Web Developer skilled in both front-end and back-end development, with a passion for creating dynamic and user-friendly web applications. Seeking Frontend Developer opportunities to leverage expertise in React.js, Vue.js, and Tailwind CSS.

Expertise

React Js	●●●●●●
Typescript	●●●●●●
Vue Js	●●●●●●
Next Js	●●●●●●
Tailwind Css	●●●●●●
Larvel php	●●●●●●
UI / UX	●●●●●●
Django	●●●●●●

Education

System Developer .NET (2019 - 2021)
TUC Sweden AB

Studied .NET system development, focusing on C# programming, JavaScript, HTML5, and CSS.

Acquired skills in UI construction, algorithm design, TDD, and agile methodologies like Kanban and SCRUM. While I possess a holistic understanding of software development and effective business communication, I haven't yet had professional work experience with C# .NET.

Internship (LIA - Lärande i arbete)

Smart Cash, (Oct 2020 - Feb 2021)

Work Experience

Web Applications:

Position: Frontend Developer with Backend Contributions

(Smart Cash AB)
(Mar 2021 - Jan 2022)

Project: Brinto Booking | **Time Taken:** About 1 year | **Technologies Used:** Laravel PHP and Vue.js

Brief Description:

The web application, designed for services like salons and restaurants, enables online appointment scheduling and includes a secure payment system. Though not deployed due to company choices, I can demo it upon request.

Key Achievements/Responsibilities:

- Enhanced proficiency in Vue.js through extensive hands-on experience, leading to notable improvements in frontend development.
- Worked with various functions in both frontend and backend of the web application.
- Gained deeper understanding and skills in Laravel by contributing to backend functionalities.
- Leveraged Vue.js and Laravel to optimize the user interface, user experience, and backend processes.

Position: Solo Full-stack Web Developer (Smart Cash AB) (Aug 2021 -Apr 2022)

Project: Botnova | **Time Taken:** About 9 months (worked in parallel with the Brinto Booking project)

Technologies Used: Laravel PHP and Vue.js

Brief Description:

- Storing customer data and tracking which customers have specific products.
- Inventory management to monitor products in stock.
- Errand creation and prioritization capabilities.
- Integration with Fortnox for seamless invoice generation.
- In-built Trello board for effective errand prioritization and task management.

Key Achievements/Responsibilities:

- Enhanced expertise in Laravel, Vue.js, and Tailwind CSS, resulting in a cohesive design and effective functionality.
- Developed skills in API integration, streamlining data exchange and third-party functionalities.
- Gained hands-on experience in deploying web applications on AWS, ensuring optimal performance and scalability.

Position: Front End Developer (Team Role) (Smart Cash AB) (May 2022 - Sep 2023)

Project: Brinto Pay | **Time Taken:** Started approximately 1 year ago and ongoing.

Technologies Used: Django and React.js

Brief Description:

design an ordering platform that simplifies both dine-in (via QR-code scanning) and delivery options for customers. The system not only ensures ease of use for patrons but also provides restaurants with efficient order management, enhancing service speed and precision.

Key Achievements/Responsibilities:

- Significantly enhanced proficiency in React.js through hands-on project development.
- Gained substantial expertise in designing with Tailwind CSS, improving visual aesthetics and user interface responsiveness.

Position: Solo Frontend Web Developer (Smart Cash AB) (Feb 2023 - May 2023)

Project: Smart Cash Website | **Time Taken:** 3 to 4 months, extended due to multiple design

Technologies/Tools Used: React.js, Figma changes and company requests.

Brief Description:

Developed a mobile-responsive website that displays the company's products, with a feature allowing customers to indicate their interest in specific items.

Key Achievements/Responsibilities:

- Significantly improved proficiency in React.js through hands-on development.
- Enhanced design skills using Tailwind CSS, contributing to a visually appealing and user-friendly interface.

Afram Hanna

Frontend Developer - Full stack developer

Personal letter

I am very interested in the Frontend Developer position at your company. While I specialize in frontend tasks, I'm also well-equipped to handle full-stack development. With three years of experience in web development and a formal education as a "Systemutvecklare," I am excited to use my skills to benefit your team and company.

During my studies and work at Smart Cash, I learned various aspects of system development, from backend logic and database management to frontend design and user interface creation. I have hands-on experience with tools like React.js, Vue.js, Laravel PHP, and Tailwind CSS, among other technologies.

TUC Yrkeshögskola, where I completed my studies, gave me a solid grounding in software development methodologies, design patterns, and other core concepts. Although I gained expertise in multiple facets of development, my primary passion is frontend work. I love designing user-friendly interfaces and always ensure my code is clean and efficient.

I speak Swedish fluently, and Arabic is my first language. I can read and write well in English and am putting in efforts to further improve my spoken English.

Please find my attached CV for a detailed look at my qualifications. I am excited about the possibility of joining your team and believe that my unique background can bring a fresh perspective to your projects.

Thank you for considering my application. I hope we can talk more about how I can be of value to your company. You can reach me at 073-545 48 29 or afram.h@hotmail.com.

Sincerely **Afram Hanna**
